What does Windows 7 end of support mean?

Microsoft will no longer provide security patches, updates or support for the Windows 7 OS.

What are the potential risks of not moving to Windows 10?

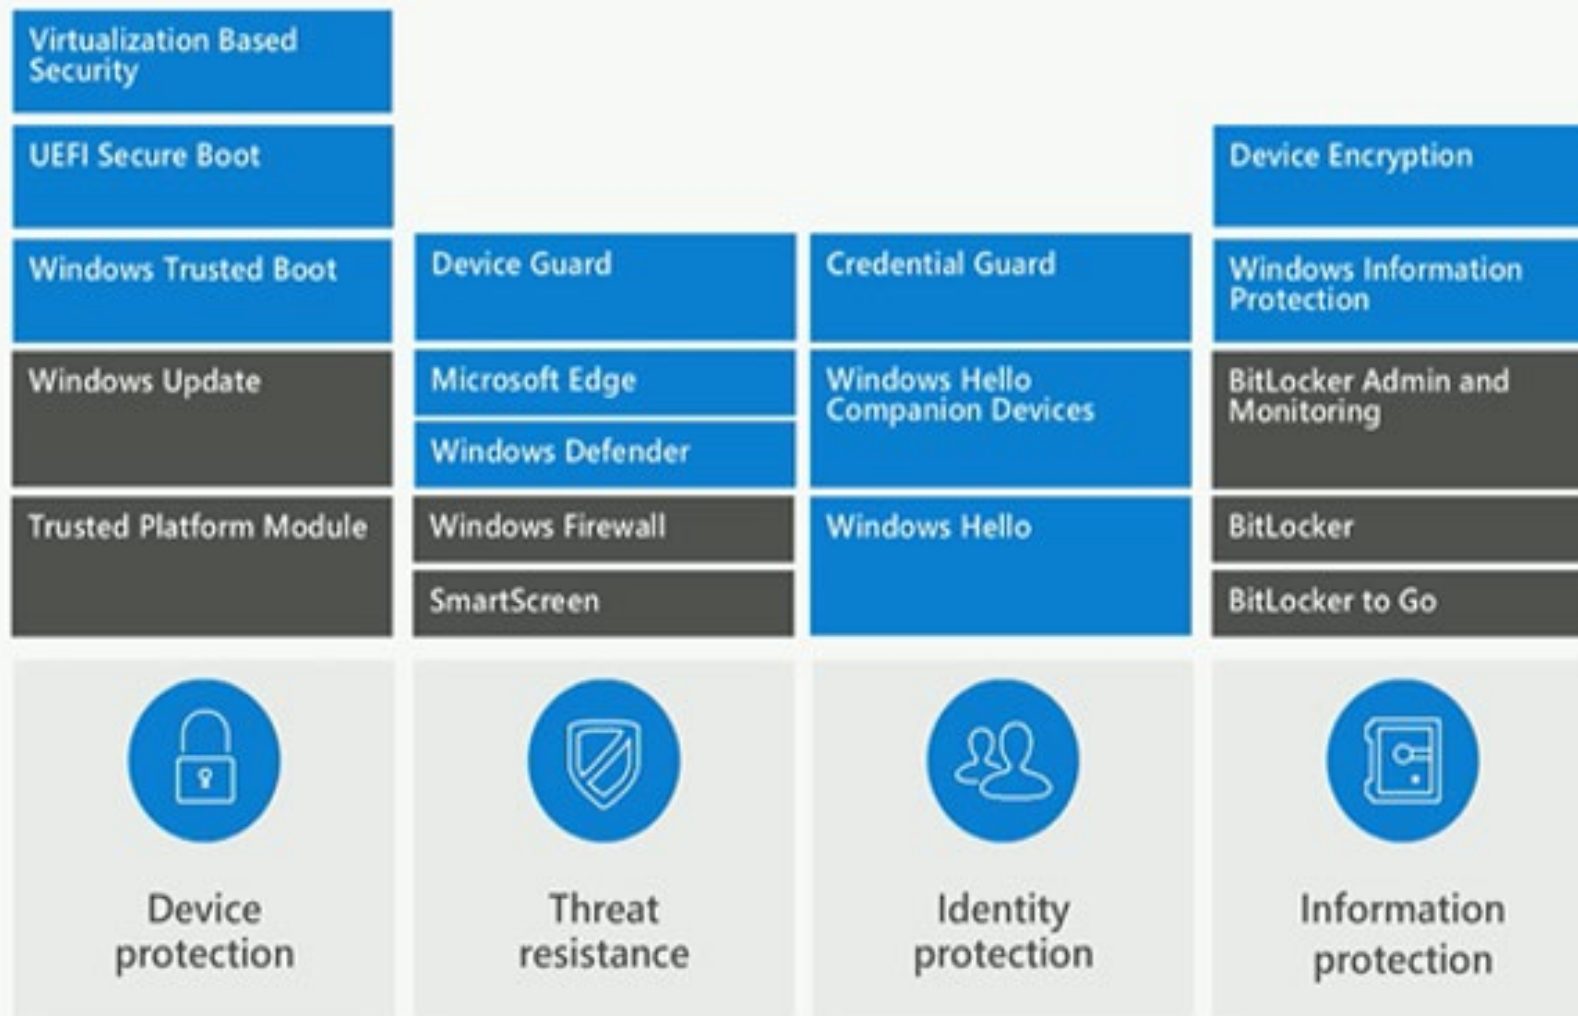

- Reputational risk through security vulnerabilities.
- No more security patches – i.e. potential exposure to cyber attack.
- Additional upgrade patches will no longer be issued.
- Non-compliance with PCI could result in fines.

What do you need to do?

January 2020 may seem like a long way away, but it isn't. **Connect with Insure ATM now** and together we are able to offer you a cost-effective solution. With this solution you stay in-dependend. You are in control of the implementation and time schedule.
